

# Maxim Dragon | Personal Profile

Electrical Engineer

## Profile

Max has undertaken electrical engineering systems design work since he started in the industry as an Apprentice Electrical Engineer in 2005. He is responsible for projects from the early feasibility stages, all the way through to the eventual end of defects inspections.

Throughout his career, he has gained extensive experience working on a range of Local Authority projects such as schools, museums, libraries, care homes and other council owned properties. Max has also provided design services on several MoD projects.

This type of work suits Max's work ethic and personality well; he is a detail person and very thorough in everything he does. Max is also always polite, supportive and enthusiastic and is able to maintain a positive disposition and attitude at all times. These qualities can be infectious to others in a team environment therefore, Max can be a valuable asset to any project team.

## Qualifications

**HNC in Electrical and Electronics Engineering**

## Memberships

**TMIET**

## More about Max

*An interesting fact about me is...*

**My middle name is Merlin.**

*If I could have one super power it would be...*

**The power to turn water into stout, or maybe the power to automatically make used kitchenware clean. That's a tough one!**

*My greatest achievement is...*

**She's about 5 foot 3 with a very smoochable face.**
