

Robert Keith Hayward | Personal Profile

Director / Electrical Design Engineer

As a founder of the Company, and having over 35 years of experience of working in the industry, Rob provides a wealth of knowledge and expertise in Electrical systems and project management. He specialises in Lift design, Data Centres and site-wide Electrical Infrastructure solutions, and also Education and Healthcare schemes.

Rob is able to build a rapport and effective relationships with all the design team, due to his warm and enthusiastic temperament. He provides a consistent and reliable approach to his work which is always delivered in a calm and responsive manner. Being our Director responsible for Health and Safety, Rob will take a considered approach to any task and is level-headed in a crisis.

Rob's strength is his stamina; he is able to maintain momentum on any task regardless of type or duration. He also is expert at planning and time management. He will ensure that he is prepared well in advance of any target or deadline allowing smooth and problem-free delivery.

Memberships

ACIBSE, **AMIHEEM**

More about Rob

If I won the lottery I would... spend carefully!

If I could have a super power it would be... invisibility

What I love most about my job is... the job satisfaction when the project is completed and you have had an input.

At the weekend you will find me... watching my two sons play football (also linesman duties when required) and my daughter play netball; then cleaning cars.
