

- Project** New Laundry Washing Equipment, Central Laundry (for Jersey General Hospital), Jersey
- Construction Value** £1.1M Project cost including equipment
- Client** States of Jersey Health and Social Services Department
- M&E Contractor** G.E. Griffiths Limited
- Equipment Specialist** Broadbent Vega Systems
- Completion** August 2015
- TNG Provided** Full Duties Detailed Design & Above Ground Public Health Design
- Project Summary**

This project comprised building, mechanical and electrical works associated with the phased removal and installation of new laundry equipment, including the final connections to all equipment over an eight week period.

The laundry facility provides for all of Jersey General Hospital's laundry needs, including bedding, towels, gowns and surgical scrubs.

The main batch washer and dryers (3 no.) were replaced, and 3 no. barrier washers and a clean and dirty separation wall were added, along with a shower room and changing pass-through lobby.
- TNG's Commission Included**

Close liaison and co-ordination with Laundry Equipment Specialist, with regards to final connection points and fittings, was required.

A period of enabling works prior to the first piece of equipment delivery, allowed weekend working to adapt the existing services whilst the Laundry was closed to facilitate a smooth installation process.
